

CUSTOMER CHALLENGES

Many large organisations have learned the hard way after recovering from catastrophic security incidents. Efficient detection and response to cybersecurity incidents should have been one of the key pillars in their risk management strategies.

Building such a capacity is an extremely tall order: technological and process integration is complex, and both organisations internally, and the job market, lack people and skills for managing a security strategy.

Security monitoring, detection, and response, usually implemented in the form of a SOC, is a central countermeasure in all cybersecurity frameworks (e.g., NIST, CIS, etc.). It has demonstrated, based on real-life incident data, to be one of, if not the most effective controls to detect threats and attacks.

Average time to contain a breach was **80 days**.

Average of **287 days** to identify a data breach.

30% of data breaches involve internal actors.

Supply chain attacks were up more than **100%** year-on-year in 2021.

77% of companies do not have an incident response plan.

60% rise in data breaches due to employees working remotely.

Noncompliance means **100% chance of jail time** for negligence as noted in POPIA and Cybersecurity Bill.

THE SOLUTION:

COCRE8'S SECURITY OPERATIONS CENTRE

- External threat detection, response and remediation.
- Addresses threats from external adversaries, such as cybercriminals and hostile state actors.
- Privileged partner threat detection, response, and remediation.
- Addresses threats from privileged external partners, such as vendors or outsourcing partners.
- Internal threat detection, response, and remediation.
- Regulatory compliance.
- Provides compliance with required legislation or industry requirements.

WHY CoCre8?

Proactive services that feed into the SOC such as the Fortitude platform for Penetration Testing and Proactive Detection.

Hybrid SOC - Duplication of critical components and functions in our SOC, increasing reliability, with the added ability to cross-function services between SOC's at any given time.

COCRE8 KEY DIFFERENTIATORS

- CoCre8's SOC is technology agnostic: very few who can offer this.
- SLA – Resolution within 2 hours: uses a similar engine to AI.
- Value Add – Cybersecurity Consultancy Service – people, process and technology perspective with a GAP analysis.

CoCre8 **SOC-as-a-Service** offers a variety of services, which can be customised to your risk context, process, and technology environment.
